Veolia Water Solutions & Technologies Recognizes Slot-Nankai for Safety Achievement for Large-scale Mining Project

Sriracha, Thailand, Oct. 15, 2012 - [Veolia Water Solutions & Technologies](#) has presented Slot-Nankai, a supplier and fabricator of pressure vessels and modules, an award for safety practices during the fabrication of a key project. Slot-Nankai achieved more than 100,000 man-hours without an accident for a project in the Australian mining industry which will utilize Veolia's [HPD evaporation and crystallization technology](#) to process mine water inventory.

The award was presented at the Slot-Nankai facility in Thailand on September 20th in recognition of the milestone. Following the awards ceremony, lunch was served to the more than 400 employees who work at the location to celebrate the accomplishment.

The award also recognized the outstanding fabrication effort demonstrated by Slot-Nankai due to the complexity of the work specific to this project. The entire system is modularized with all utilities, cabling, access steel and piping in order to ship into Australia as complete as possible. This is due to the remote location of the job site and the need to minimize the field installation effort.

"This is a testament to the Veolia Project Team's focus on safety and efforts to raise the awareness of safe work practices among our fabricators all around the world," remarked Veolia Project Manager, Bob Patchak from the ceremony, "The module shop and their three main subcontractors for piping, electrical, and insulation work have just reached the 100,000 man-hour milestone without any accidents and will remain committed to the same level of safety practices as they complete the project."

The majority of the equipment fabrication and construction for this project is being performed in Thailand. All vessels and modules will be completed and shipped to the job site in Australia in the fourth quarter of 2012.

SLOT-NANKAI COMPANY LIMITED is a supplier of quality mechanical design and fabrication of heat exchangers, reactors, pressure vessels, and piping. SLOT-NANKAI also provides engineering services and construction of chemical facilities including detailed engineering, manufacturing and installation.

The products have been supplied to domestic and overseas industries with high technical know-how and high quality adherence to JIS, ASTM, API, TEMA, and ASME codes.

Press Release

Veolia Water Solutions & Technologies, subsidiary of Veolia Water, is a leading design & build company and a specialized provider of technological solutions in water treatment. With 10,767 employees, Veolia Water Solutions & Technologies recorded revenue of \$3.3 billion in 2011. www.veoliawaterst.com

Veolia Water, the water division of Veolia Environnement, is the world leader in water and wastewater services. Specialized in outsourcing services for municipal authorities, as well as industrial and service companies, it is also one of the world's major designers of technological solutions and constructor of facilities needed in water and wastewater services. With 96,651 employees in 69 countries, Veolia Water provides water service to 103 million people and wastewater service to 73 million. Its 2011 revenue amounted to 17.99 billion. www.veoliawater.com
